

GlobalSign Limited Warranty Plan

Version 1.3

IMPORTANT NOTICE: THIS COMMUNICATION DOES NOT SUBSTITUTE OR REPLACE THE GLOBALSIGN CERTIFICATION PRACTICE STATEMENT ON www.globalsign.net/repository.

A limited warranty scheme for the users

GlobalSign makes available reliable certification services to users of public networks like the Internet as well and private networks. GlobalSign's groundbreaking limited warranty scheme supports the network of trust that GlobalSign makes available to users of public and private networks.

Addressing the needs of the users of Public Key Infrastructure (PKI), this comprehensive limited warranty scheme covers core risks commonly associated with digital certificates.

Who is this Limited warranty plan for?

With a view to create a network of Trust, GlobalSign extends its limited warranty scheme to both **subscribers** and **relying parties**, addressing risks typically associated with digital certificates.

Which products are covered?

GlobalSign's Limited Warranty Statement extends to individuals and/or legal persons that have successfully applied, received and accepted a valid certificate of the following categories, as described in the table below:

GlobalSign Products	Certificate Class Status?
• PersonalSign 2 certificate	Yes
• PersonalSign 2PRO certificate	Yes
• PersonalSign 3 certificate	Yes
• PersonalSign 3PRO certificate	Yes
• OrganizationSSL certificate	Yes
• ExtendedSSL certificate	Yes
• DomainSSL certificate	Yes
• ObjectSign certificate	Yes
• DocumentSign certificate	Yes

This limited warranty plan does not extend to GlobalSign class 1 certificates and similar types such as free or test certificates.

Issued by whom?

This limited warranty plan extends to all GlobalSign certificates issued by any GlobalSign Registration Authority or a GlobalSign Local Registration Authority located anywhere in the world.

Possible risks covered

GlobalSign's Limited Warranty Plan warrants against the remote possibility of any of the following risks occurring:

Risks for a GlobalSign RA

1. A subscriber or relying party are protected for errors that might occur in the identification process resulting in damages for them. Although registration with GlobalSign is subject to strict procedures and the RA personnel assigned therefore are thoroughly trained and duly accredited, such errors might still occur.
2. A subscriber can equally insure against the risk of a Registration Authority or Local Registration Authority losing documents that are used to verify the identity of a subscriber and support the issuance of a GlobalSign certificate.

Risks for GlobalSign and a GlobalSign CA

GlobalSign root signs other CAs. This limited warranty scheme assures that subscribers and relying parties of GlobalSign as well as any GlobalSign CA are protected against risks associated with the loss or compromise of the top root CA private key.

Limited warranty plan caps

GlobalSign limits the maximum amount it may pay to a subscriber according to the class of the certificate as explained in the table below:

• PersonalSign 2 certificate	2,500 Euro or USD equivalent
• PersonalSign 2PRO certificate	2,500 Euro or USD equivalent
• PersonalSign 3 certificate	37,500 Euro or USD equivalent
• PersonalSign 3PRO certificate	37,500 Euro or USD equivalent
• OrganizationSSL certificate	100,000 Euro or USD equivalent
• ExtendedSSL certificate	250,000 Euro or USD equivalent
• DomainSSL certificate	100,000 Euro or USD equivalent
• ObjectSign certificate	37,500 Euro or USD equivalent
• DocumentSign certificate	5,000 USD or Euro equivalent

At no additional cost

All costs associated with the GlobalSign Limited Warranty Plan are already included in the final price of a certificate that a subscriber pays while there are no additional or hidden costs associated with this plan.
