

GlobalSign SSL Certificates

GlobalSign offers a simplified range of SSL Certificates – fitting neatly into the three newly defined SSL classes of Domain Validation (DomainSSL) issued in 5 minutes or less, Organization Validation (OrganizationSSL) and Extended Validation (EV SSL - ExtendedSSL) activating the green address bars in next generation browsers.

All GlobalSign SSL Certificates include premium features such as strong security at no additional cost – a feature other high value SSL Providers charge at additional rates. Further key features, such as unlimited Server Licenses and lifetime replacement policy, ensure that GlobalSign SSL customers receive the best value, most feature packed SSL available today.
