

PersonalSign Certificate using Vista & Internet Explorer 7

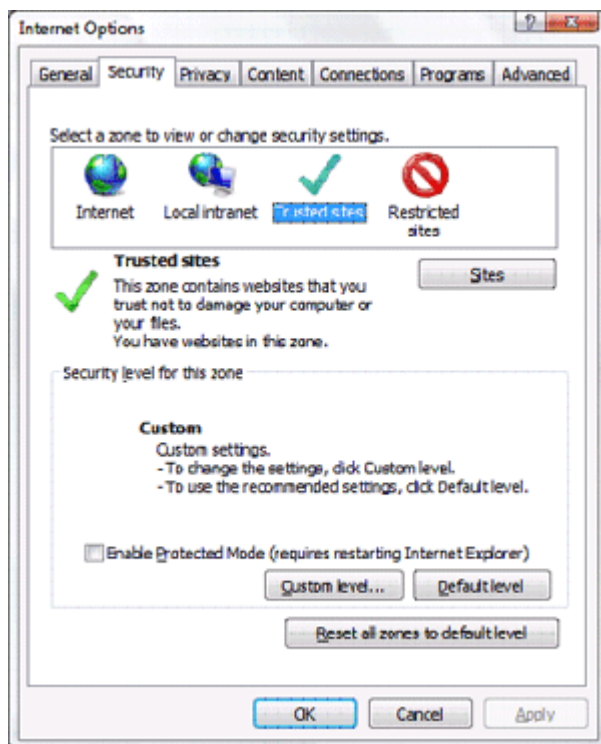

Before you start please make the following changes;

- Open Internet Explorer
- Go to 'Tools'
- select 'Internet Options'
- select the 'Security' tab
- highlight 'Trusted sites' and select 'Sites'

...and add the following website names in 'Trusted sites';

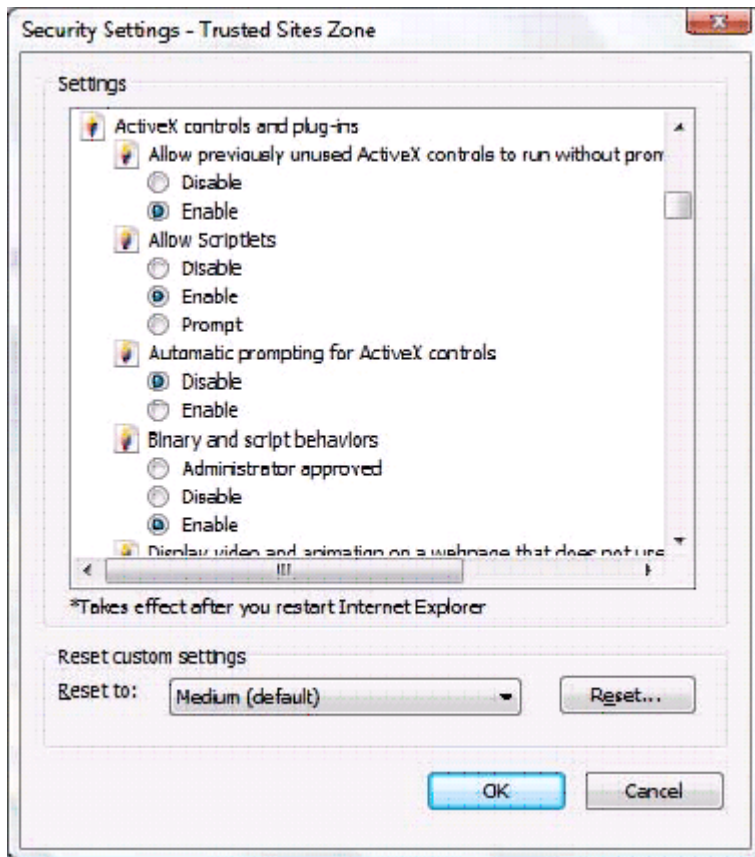

- https://system.globalsign.com
- https://secure.globalsign.net
- http://secure.globalsign.net

Then close Internet Explorer and **restart** so the changes can take effect.

Once you have restarted Internet Explorer 7 you need to reopen Internet Options, click on the security tab then click "Custom Level".

This will then open a box called "Security Settings - trusted Sites Zone".

You need to scroll down to "Active X controls and plug-ins" and change the following default settings.

- Allow previously unused ActiveX controls to run without prompt: set to **Enable**
- Allow Scriptlets: set to **Enable**
- Automatic prompting for ActiveX controls: set to **Disable**
- Binary and Script behaviours: set to **Enable**
- Display video and animation on a webpage that does not use external media player: set to **Disable**
- Download Signed ActiveX controls: set to **Prompt**
- Download unsigned ActiveX controls: set to **Prompt**
- Initialize and script ActiveX controls not marked as safe for scripting: **Prompt**
- Run ActiveX controls and plug-ins set to **Enable**
- Script ActiveX controls marked safe for scripting: set to **Enable**
 1. Click Ok
 2. Click Apply
 3. Close and re-open IE7

Note: After you have received the certificate and it is installed within Internet Explorer you can change your security settings for Internet Explorer back to their Default settings within the Internet Options by clicking on the "Default level". Note: This can only be done AFTER you have installed your certificate.
