

GlobalSign Fast Facts

GlobalSign's Digital Certificate solutions enable a world of secure Internet transactions, authenticated access control, safe document exchange and protected online identities. GlobalSign's worldwide customers include enterprises of all sizes across all industries, as well as individuals, hosting companies and OEM partners.

Our background

Founded in 1996, GlobalSign became a GMO Internet Inc. group company in 2006. GMO is a public company quoted on the Tokyo Stock Exchange (TSE: 9449) and whose shareholders include Yahoo! Japan, Morgan Stanley and Credit Suisse First Boston.

Thanks to its teams of industry experts around the globe, GlobalSign established itself as a leading CA, and has always kept up with the constantly evolving environment of digital security. Today it continues to provide the most innovative solutions and the best services to its worldwide customers.

A leader in its market, GlobalSign is WebTrust accredited and works in partnership with Microsoft and Adobe and has been referred to as an example to follow for all Certification Authorities by Mozilla Firefox in 2011.
