

GMO GlobalSign is committed to protecting the earth's vital resources and promoting sustainable economic development. We understand the harmful effects our operations may have on both the local and global environment and are committed to reducing those effects. We also seek to raise awareness and promote internally the need to reduce our impact on the environment.

In keeping with the above, GMO GlobalSign endeavors to:

- Comply with all applicable international, regional and national environmental legislation or regulation, industry guidelines it endorses and other requirements, such as approved codes of practice.
- Assess the environmental impact of its business operations, activities, products and services including specific regard to reducing any such impact, prevention of pollution and creation of sustainable business processes.
- Use natural resources more efficiently to reduce environmental impact and operating costs with an aim to creating and achieving a decarbonised and recycle oriented business.
- Maximize the efficient use of energy, reduce the use of all raw materials and supplies and recycle where possible in the course of all business activities in order to efficiently use resources and help reduce the effects of human induced global warming.
- Raise awareness, encourage participation and empower our employees to act in environmental matters relating to our business. We promote the idea that all directors, managers and employees have responsibility to take action with local consideration to environmental issues in their everyday lives, including actively participating in environmental activities of their local communities.
- Select and work with suppliers, vendors and partners that adhere to GlobalSign's principles and policies and positively promote and conduct their businesses in an ethical, social and environmentally responsible manner.

We will work to continually improve our environmental performance and review and update this policy regularly to ensure our business remains sustainable.

[About GlobalSign](#)

GlobalSign is the leading provider of trusted identity and security solutions enabling businesses, large enterprises, cloud service providers and IoT innovators around the world to secure online communications, manage millions of verified digital identities and automate authentication and encryption. Its high-scale Public Key Infrastructure (PKI) and identity solutions support the billions of services, devices, people and things comprising the Internet of Everything (IoE).
