GlobalSign®

SSL Secure Server Certificates
Secure your website, online transactions, web mail and other online services.

GlobalSign offers a simplified range of SSL Certificates – fitting neatly into the three newly defined SSL classes of Domain Validation (DomainSSL) issued in 5 minutes or less, Organization Validation (OrganizationSSL) and Extended Validation (EV SSL - ExtendedSSL) activating the green address bars in next generation browsers. All GlobalSign SSL Certificates include premium features such as strong 2048 bit security with unlimited server licensing at no additional cost – a feature other high value SSL providers charge at additional rates. Further key features such as Phishing and Malware checks are available to provide additional security for your visitors and to prevent your websites becoming blacklisted. GlobalSign SSL customers receive the best value and most feature packed SSL Certificates available today.
