

REGIONAL PARTNER PROFILE

TRUSTZONE

About TRUSTZONE

TRUSTZONE is a leading Scandinavian IT security company that provides identity and trust solutions and services. Since the company was founded in 2004, TRUSTZONE has been distributing digital certificates to European enterprises focusing on the Scandinavian markets.

TRUSTZONE

Today TRUSTZONE is among the biggest European providers of digital certificates and the TRUSTZONE brand is now a well-known name to most European organizations.

TRUSTZONE's staff are professional and highly skilled consultants with great experience from the IT business. They are always able to advise and consult with their customers and partners about all aspects of IT security and they pride themselves to be able to work with all companies irrespective of size or market sector.

"We have a successful relationship with GlobalSign and we are keen to develop our partnership further, they are a great company, very supportive and helpful in developing our business further".

Jacob Højmark Nielsen - CEO, TRUSTZONE

Partnership with GlobalSign

TRUSTZONE has been in partnership for over 12 years to offer digital certificates and security services to its Scandinavian customer base. For the last eight years, TRUSTZONE has grown to become a fully dedicated GlobalSign Regional Partner delivering GlobalSign's Managed Public Key Infrastructure solutions – enabling web and server security, secure email, document and code signing and user and device authentication.

As security becomes more and more critical to enterprise businesses, TRUSTZONE and GlobalSign have strengthened their partnership and TRUSTZONE continue to expand their security solution offerings and growing their market base. Working closely with GlobalSign has enabled TRUSTZONE to establish a regional leadership position and keep them ahead of their competitors.

About GlobalSign

GlobalSign is the leading provider of trusted identity and security solutions enabling businesses, large enterprises, cloud service providers and IoT innovators around the world to secure online communications, manage millions of verified digital identities and automate authentication and encryption. Its high-scale Public Key Infrastructure (PKI) and identity solutions support the billions of services, devices, people and things comprising the Internet of Everything (IoE).
